<b>1. THE COURSE</b>

## 1.3) Comments on class activities:

- I was not able to go to many of the field trips and extra credits because i was in another class
- Loved all the discussions in this class!
- Some readings were difficult to understand, but later discussions made them clear. The essays were also made for us to think critically, and while the class assignments weren't easy, they were extremely helpful to my learning.
- The class activities were phenomenal! They pushed us out of our comfort zone but in a way that allowed us to grow.
- This class called for creative thinking. Although challenging, it served as a valuable growing process which I appreciated greatly.

## 1.6) Comments on class discussions:

- Awesome!
- Class discussions assisted in developing insight that would not be capable otherwise.
- Professor Davis created an environment that was very open and non-judgmental allowing us to really open up and bring our own opinions and ideas to the table. Discussions in this class were a constant flow of knowledge coming from everyone and our experiences and how the related or even how our outlook changed based on the material we were studying.
- The class was very active and participated a lot. Because the subject matter usually was very controversial and a lot of times depended on personal experience, hearing everyone's different stories and perspectives was extremely helpful.
- Very open and felt comfortable in the class to voice my opinion. Great atmosphere

## 1.9) Comments on exams/ quizzes/ tests:

- Felt like on the midterm that the long answers should have been short answers and that the short answers should have been a long answer
- I love that we can write short answers/essays on our tests, lets us express things and relate them to personal experiences
- The tests weren't easy or difficult but were tedious and long. They did, however, serve as good refreshers for all the material learned. And a lot of times in taking the tests, new pieces of information were discovered and reflected upon that changed my perspective on certain things.
- These were some of the best written tests I've ever taken. They were based on the material, related to real-life experiences, than allowed us to make the connection from our learning.

## 1.11) Comments on course organization:

- It was very helpful how Professor Davis would send a summary email at the end of every class. It helped to understand the expectations of the next class. Great communication skills and organization throughout the course. Professor Davis should instruct other professors on how to carry out a course.

## 1.14) Comments on course pace:

- I loved some of the subjects so much I wish we could have spent more time on them, but the course progressed very well throughout the semester.

2.5) Comments on enthusiasm:

- Best professor ever!
- Juliet was very enthusiastic about the subject and that allowed for a great classroom setting with a lot of student participation. I loved the class.
